

Comment on proceeding 02-278:

FCC should not implement any proposal that would lessen

Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has definetly improved my time at home.

I am not running to the phone every few minutes. If I want to buy something, I will go to

the store or contact the company to whom I wish to purchase from. I do not want tele-marketing calls. I used to receive as many as 10 calls per day. Now I only receive 1

to 2 a month.
